

## ***Is sustainability important to you?***

***Well it's very important to us. At Angelic Organics Learning Center, we strive to empower people to create sustainable communities of soils, plants, animals and people through educational, creative and experiential programs. Our partnership with Angelic Organics, a vibrant community supported agriculture farm, provides the foundation for our education and training outreach.***

***At the Angelic Organics Learning Center we want to nurture farmers and eaters as leaders who will strengthen the local food system, economy and culture. Share our passion local farms, food and land and our commitment to current and future generations by becoming a board member.***

***We seek volunteer leaders to team with us and guide our Marketing & Communications, Resource Development, and Technology Committees. There are also opportunities with the Program, Governance, and Ecological Facilities Committees.***

***Consider becoming a board member.***

***If this is where your passion lies, consider joining our board of directors to help drive the future of sustainable food systems by expanding our programs at the Angelic Organics farm, regional farms, urban growing sites and all of our program sites throughout northern Illinois and southern Wisconsin.***

***For more information, contact Janet Gamble, Chair, AOLC Governance Committee at 262-642-3531, or Tom Spaulding, Executive Director at 815-243-1554.***
